

The Overhead Door Professionals

• low clearance • commercial track • high lift

Agricultural

Commercial

Residential

New or existing buildings, our low clearance door gives you the extra headroom to accommodate today's larger combines and tractors, without the extra cost. Doors are insulated and super insulated for strength and thermal efficiency.

New construction: Low clearance door will give you an extra 7 1/2" headroom, saving on additional sidewall height needed to accommodate standard doors.

Existing buildings: Get full use out of your older quonset by replacing the door with a Low Clearance Door from Palliser. 20' x 16' Doors can be installed in most quonsets.
