GREENTRONICS

RITEHEIGHT

LOWER THE BOOM ON DRIFT

MINIMIZE DRIFT • PROTECT NOZZLES • PLUG & PLAY

BASE PRICE
$6955.00 CAD

Field contours change fast—your boom height should too. RiteHeight's smart sonar auto-adjusts in real-time, minimizing drift and protecting nozzles for consistent coverage. Plug-n-play installation works with most self-propelled and pull-type sprayers, with 8-sensor systems to suit even the widest booms. Three modes adapt to crop growth, with ISOBUS or 7" touchscreen control.
